

Part A: Participant Demographics

The following table provides an overview of the six interview participants whose insights informed the dimensional scoring and technical debt characterisations presented in the Performance Analysis Framework (Chapter 6). Participants were selected based on their direct, hands-on involvement in SAP SuccessFactors extension and integration projects, with a minimum of five years of relevant industry experience. All names and organisational identifiers have been anonymised to protect confidentiality.

Table A.1 — Interview Participant Demographics

Respon dent ID	Industry	Enter prise Size (Employee es)	Respon dent Position	Inter view Duration	Inter view Date
P1	Professio nal Services (IT Consulting)	10,00 0+	Senior SAP Integration Architect	62 min	12 March 2026
P2	Manufact uring (Automotive)	25,00 0+	HRIS Director	55 min	14 March 2026
P3	Financial Services (Banking)	45,00 0+	Enterpr ise IT Infrastruct ure Director	70 min	18 March 2026

P4	Retail (Fashion)	8,000	SAP BTP Development Lead	48 min	21 March 2026
P5	Healthcare (Pharmaceuticals)	15,000+	Cloud Integration Manager	58 min	25 March 2026
P6	Technology (SaaS Provider)	3,500	Senior Cloud Platform Architect	52 min	28 March 2026

Participant Selection Criteria:

Minimum 5 years of direct experience with SAP SuccessFactors or equivalent cloud-based HCM platforms.

Active involvement in at least two full-cycle extension or integration projects.

Current role in enterprise architecture, HR technology leadership, or cloud platform engineering.

Represented organisations spanning diverse industries (manufacturing, financial services, retail, healthcare, technology, and professional services) and enterprise sizes (3,500 to 45,000+ employees).

This purposive sampling ensured that the Framework's dimensional ratings and technical debt typologies were grounded in real-world practitioner insights rather than purely theoretical constructs.
